**La Cité Miroir de Liège's new exhibition will immerse you in a world where appearances can be misleading... Get ready for an incredible journey.**

### Troubled feelings and multiple truths

Optical, tactile, audio illusions will trick your brain - no matter how sharp you usually are. This is meant to confuse you and make you experience a different reality but also help you understand the many aspects that might affect your judgement on a daily basis.

### A scientific sponsorship

This project is supported by Albert Moukheiber, a doctor in cognitive neuroscience and clinical psychologist. His video

capsules will give you some context to make the most of this exhibition and experiences.
